Here is the most current. Also, I removed oasis from RTC and placed it back onto the active list until I get a response on its status.

I am curious how you get 148 Active non-compliance?

When I compile, I get 148 rows which includes the extra Cold Springs and the header. Which tells me I have 146 actives.

I am with you on the 169/166* RTC where *=three systems on both lists.

I threw Oasis back into the out-of-compliance pot since I can't figure out if they are in or out.
